

Frequently Asked Questions about Springer Sidewalk Signs

What Is The 'SPRINGER' Sign Face Made Of ?

24" x 36" x 10mm Opaque White corrugated plastic that is ready for 2-sided graphics; the face is almost 1/2" thick and weighs 2 lbs.

How Is The 'SPRINGER' Sign Face Decorated?

The sign face is surface treated and accepts computer cut vinyl, large format digital prints on a pressure sensitive material and screen printing; all without any surface preparation.

How Much Wind Can The 'SPRINGER' Sign Handle?

When the base is filled with 1 gallon of water the sign face will handle 30+ MPH winds; extra water can be added for additional wind resistance.

How Much Does The 'SPRINGER' Sign Weigh?

The complete sign with 1 gallon of water in the base weighs less than 22 pounds (10 kg) for portability.

How Much Do I Charge For The 'SPRINGER' Sign?

Most sign shops sell the sign complete with graphics and base their price on their normal charge for a 2-sided 24" x 36" sign (without substrate) plus \$69.50 - \$79.50 for the sign; depending on your market and design, selling prices usually range from \$159.00 - \$199.00.

How Durable Are 'SPRINGER' Signs?

'SPRINGER' signs are virtually indestructible due to their high strength technopolymer base with non-slip rubber feet and galvanized heavy duty springs. The water filled base and high density sign face can handle all conditions from Texas summers to Canadian winters.

How Large Can I Make 'SPRINGER' Signs?

Extra spring assemblies, for attachment to the center hole on the base, are available for Super-Sized sign faces up to 28" x 44" / 30" x 40". Just purchase 10mm corrugated plastic with the flutes in the vertical direction from your sign supplier, decorate and attach to the springs.
